## Profile Summary

Frontend & UI/UX Developer with expertise in **React.js**, **SCSS**, and **Firebase**. I specialize in crafting **pixel-perfect**, responsive, and accessible interfaces while building reusable components for scalable applications. Experienced in integrating REST APIs and optimizing performance to deliver smooth, data-driven interactions. A collaborative team player, focused on creating seamless user experiences across devices.

## Technical Skills

React.js, JavaScript (ES6+), HTML5, CSS3, SCSS, Bootstrap, Figma, Firebase Authentication, Node.js, Express.js, MongoDB, REST APIs, Docker, Git/GitHub, Responsive Design

## Professional Experience

- Jan 2025 – **Frontend & UI/UX Developer**, SCEPTRUM, Remote  
Present
- Engineered pixel-perfect, responsive layouts in collaboration with designers using **Figma**, ensuring UI consistency across devices.
  - Implemented user interfaces with **HTML5**, **SCSS**, and **JavaScript**, optimizing load speed and usability.
  - Built small, reusable components to improve scalability, maintainability, and development efficiency.
  - Integrated **REST APIs** into frontend components to deliver seamless, data-driven user experiences.
  - Created reusable **SCSS mixins and media queries**, enhancing responsiveness and maintainability.
  - Utilized **Git** for version control and efficient collaboration with the development team.
- Jul 2023 – **Frontend Developer**, AARSOL, Islamabad, Pakistan
- April 2024
- Delivered pixel-perfect, responsive web interfaces using **HTML5**, **CSS3 (SCSS)**, and **JavaScript**, ensuring consistency across browsers and devices.
  - Translated UI/UX designs into high-quality code, improving visual accuracy and user interaction.
  - Optimized frontend performance by refining layouts, reducing load times, and enhancing component reusability.
- Jun 2022 – **MERN Stack Intern**, CLOUD-TEK, Islamabad, Pakistan
- Sep 2022
- Designed responsive layouts using **CSS Flexbox** and positioning techniques for cross-device optimization.
  - Strengthened **React.js** expertise through state management, hooks, and reusable components for scalable development.
  - Built backend services with **Node.js & Express.js**, developing scalable RESTful APIs for multiple projects.

## Projects

### Final Year Project

- July 2024 – **Elite Glam: Web Application for Appointment Services**  
June 2025
- Built a centralized platform for salons and skin aesthetic clinics to connect with customers. Developed Admin, Business, and Customer Dashboards for seamless operations and integrated **Firebase Authentication** for secure, role-based access. **React.js**, **Firebase**

### Semester Projects

- Mar – June 2024 **Robo App, React Application**  
Developed a web application that consumes external APIs to fetch and display JSON data, utilizing **async/await** for efficient asynchronous operations and improved user experience. **React.js**, **REST API**
- Sep – Jan 2023 **Tour Management System, Web Application**  
Designed and implemented a responsive platform to streamline tour planning, bookings, and user management. **HTML5**, **SCSS**, **JavaScript**

## Education

2021–2025 **BS Software Engineering CGPA: 3.63, SZABIST Islamabad**
